Handheld Controller

Wireless Battery Status App

Company:

Draganfly Innovations Inc. is the world's longest running multi-rotor, Small Unmanned Aircraft System (sUAS) manufacturer, established in 1998. Draganfly has many world's firsts, including the first sUAS to save a life, which occurred in May of 2013 flown by the Royal Canadian Mounted Police and recognized by the Smithsonian National Air and Space Museum.

Description:

Draganflyers are perfect for high-stress, high-risk applications because they are:

- *easy to use*
- *quick to deploy*
- *fully calibrated at factory*
- *a complete solution with everything included*
- *backed by life-time telephone and e-mail tech support*

Save time, money, and lives by choosing Draganfly, the most experienced commercial sUAS company in the world.

Transport Canada Compliant:

Tested to national standards for commercial UAV operations in one of the busiest airspaces in the world, with over 12 million aircraft movements per year throughout the country.

Transport Canada

Support:

Leverage Draganfly's experience developing successful sUAS programs around the world. With the purchase of any Draganflyer sUAS, program development consulting and life-time telephone and e-mail support are included at no additional cost.

Features:

The Draganflyer Commander comes with a strong list of industry trend setting features such as:

- *quick release payload system*
- *quick release keyed props*
- *dual battery system provides redundancy*
- *patented carbon fiber folding airframe*
- *patented folding landing gear*
- *terrain sensor mitigates tip-overs*

Also included is the Draganfly digital video down-link system with digital base-station, allowing you to connect several live viewing devices, acting as a true force multiplier.

The custom made handheld controller features a direct sunlight viewable OLED touch screen to monitor critical aircraft telemetry, control the aircraft, and provide camera tilt, zoom, and shutter controls.

- *sunlight viewable telemetry screen*
- *audible alerts*
- *ergonomically designed*
- *wireless linking to other controllers*

Handheld controller wireless linking is useful in applications such as flight training or applications where a second controller is used with a dedicated camera or payload operator.

Draganflyer Commander MAX Equipment List

- (1) Rugged transport case
- (1) Accessory transport case
- (1) Draganflyer Commander airframe
- (1) Quick release 2-axis stabilized mount
- (1) Dual payload
 - 20mp 1" sensor, 3.6x optical zoom color camera
 - FLIR Vue Pro 640 Infra-Red camera
- (2) Handheld controllers
 - Allows for wirelessly linked dedicated pilot and camera operator
- (1) Live video viewing tablet
- (1) Draganfly IP base station and stand
 - Includes mini tripod and one 1350mAh battery
- (6) 6750mAh DraganFuel HV flight batteries
- (6) Quick release props (2 spare)
- (1) Dual port Lithium Ion battery charger
 - Charge two batteries at once
 - Battery fire retardant safety bag
- (1) Draganfly Surveyor flight software
 - Windows tablet or laptop is required but not included with this package
- (1) Pix4D Mapper perpetual license
 - One device
 - Includes Pix4D Cloud
- (1) Set of accessories
 - (1) Aircraft tool kit
 - (1) Safety glasses
- (1) USB with all documentation
 - Pre-flight checklist
 - Post-flight checklist
 - Emergency procedures
 - Maintenance schedule
 - Equipment manuals
 - Pilot log book
 - System log book

Simultaneous dual video stream from both the FLIR and E/O cameras

Compelling Use Cases:

Collision Reconstruction

Digital Surface Modeling

Tactical Overwatch

Industrial Inspection

Search and Rescue

Inventory and Waste Calculations

Technical Specifications

- Maximum Takeoff Weight:** 3.75kg (8.3lbs)
- Maximum Payload:** 1.0kg (2.2lbs)
- Maximum Speed:** 50km/h (31mph)
- Max Flight Time w/Payload:** 25 minutes
- Max Operating Range:** Visual Line of Sight
- Controller Range:** North America 2km
- Controller Range:** International 1km
- Operating Temp:** -24C (-13F) to +38C (100.4F)
- Maximum Wind Speed:** 35km/h (22mph)

Pix4D utilizes 2D images to produce highly precise, geo-referenced maps, mosaics, and 3D models.

Record, document, and calculate situations quickly, accurately, and non-invasively.

Export deliverables in 23 file formats compatible with CAD and GIS software.

Draganflyer Commander Public Safety Equipment List

- (1) Rugged transport case
- (1) Accessory transport case
- (1) Draganflyer Commander airframe
- (1) Quick release 2-axis stabilized mount
- (1) Dual payload
 - 20mp 1" sensor, 3.6x optical zoom color camera
 - FLIR Vue Pro 640 Infra-Red camera
- (2) Handheld controllers
 - Allows for wirelessly linked dedicated pilot and camera operator
- (1) Live video viewing tablet
- (1) Draganfly IP base station and stand
 - Includes mini tripod and one 1350mAh battery
- (6) 6750mAh DraganFuel HV flight batteries
- (6) Quick release props (2 spare)
- (1) Dual port Lithium Ion battery charger
 - Charge two batteries at once
 - Battery fire retardant safety bag
- (1) Draganfly Surveyor flight software
 - Windows tablet or laptop is required but not included with this package
- (1) Set of accessories
 - (1) Aircraft tool kit
 - (1) Safety glasses
- (1) USB with all documentation
 - Pre-flight checklist
 - Post-flight checklist
 - Emergency procedures
 - Maintenance schedule
 - Equipment manuals
 - Pilot log book
 - System log book

Simultaneous dual video stream from both the FLIR and E/O cameras

Compelling Use Cases:

Collision Reconstruction

Digital Surface Modeling

Tactical Oversight

Site Monitoring

Hot spot located. Missing driver location.

Search and Rescue

Fire Services

Technical Specifications

- Maximum Takeoff Weight:** 3.75kg (8.3lbs)
- Maximum Payload:** 1.0kg (2.2lbs)
- Maximum Speed:** 50km/h (31mph)
- Max Flight Time w/Payload:** 25 minutes
- Max Operating Range:** Visual Line of Sight
- Controller Range:** North America 2km
- Controller Range:** International 1km
- Operating Temp:** -24C (-13F) to +38C (100.4F)
- Maximum Wind Speed:** 35km/h (22mph)

Please note: Post processing software for 3D modeling and mapping is not included. Software to consider is Pix4D Mapper.

Draganflyer Commander Pro-Ag Equipment List

- (1) Rugged transport case
- (1) Accessory transport case
- (1) Draganflyer Commander airframe
- (1) Quick release 2-axis stabilized mount
- (1) MicaSense RedEdge-MX Multispectral
 - Capture rate: 1 capture/second (all bands) 12-bit RAW
 - FOV: 47.2 Degrees HFOV
 - GSD: 8cm/pixel/band @400'AGL
 - Spectral Bands: Blue, green, red, red edge, near IR (global shutter, narrowband)
- (1) Handheld controller
- (6) 6750mAh DraganFuel HV flight batteries
- (6) Quick release props (2 spare)
- (1) Dual port Lithium Ion battery charger
 - Charge two batteries at once
 - Battery fire retardant safety bag
- (1) Draganfly Surveyor flight software
 - Windows tablet or laptop is required but not included with this package
- (1) Set of accessories
 - (1) Aircraft tool kit
 - (1) Safety glasses
- (1) USB with all documentation
 - Pre-flight checklist
 - Post-flight checklist
 - Emergency procedures
 - Maintenance schedule
 - Equipment manuals
 - Pilot log book
 - System log book

Pictured with MicaSense RedEdge MX Multispectral Payload

Compelling Use Cases:

Crop Health Assessment

Digital Surface Modeling

Monitor Irrigation

Improve Yields

CIR Composite Analysis

NDVI Analysis

Technical Specifications

- Maximum Takeoff Weight:** 3.75kg (8.3lbs)
- Maximum Payload:** 1.0kg (2.2lbs)
- Maximum Speed:** 50km/h (31mph)
- Max Flight Time w/Payload:** 28 minutes
- Max Operating Range:** Visual Line of Sight
- Controller Range:** North America 2km
- Controller Range:** International 1km
- Operating Temp:** -24C (-13F) to +38C (100.4F)
- Maximum Wind Speed:** 35km/h (22mph)

Please note: Post processing software is not included. Software to consider is Pix4D Mapper or MicaSense Atlas.

Draganflyer Commander Mapping Equipment List

- (1) Rugged transport case
- (1) Accessory transport case
- (1) Draganflyer Commander airframe
- (1) Quick release 2-axis stabilized mount
- (1) Sony QX100 Camera
 - 20mp 1" sensor, 3.6x optical zoom color camera
- (1) Handheld controller
- (1) Live video viewing tablet
- (1) Draganfly IP base station and stand
 - Includes mini tripod and one 1350mAh battery
- (4) 6750mAh DraganFuel HV flight batteries
- (6) Quick release props (2 spare)
- (1) Dual port Lithium Ion battery charger
 - Charge two batteries at once
 - Battery fire retardant safety bag
- (1) Draganfly Surveyor flight software
 - Windows tablet or laptop is required but not included with this package
- (1) Pix4D Mapper perpetual license
 - One device
 - Includes Pix4D Cloud
- (1) Set of accessories
 - (1) Aircraft tool kit
 - (1) Safety glasses
- (1) USB with all documentation
 - Pre-flight checklist
 - Post-flight checklist
 - Emergency procedures
 - Maintenance schedule
 - Equipment manuals
 - Pilot log book
 - System log book

Pictured with QX100 Payload

Compelling Use Cases:

Accident Reconstruction

DSM with Contour Lines

Roof Inspection

Real Estate

3D Modeling and Mapping

Inventory & Waste Calculations

Technical Specifications

Maximum Takeoff Weight: 3.75kg (8.3lbs)

Maximum Payload: 1.0kg (2.2lbs)

Maximum Speed: 50km/h (31mph)

Max Flight Time w/Payload: 32 minutes

Max Operating Range: Visual Line of Sight

Controller Range: North America 2km

Controller Range: International 1km

Operating Temp: -24C (-13F) to +38C (100.4F)

Maximum Wind Speed: 35km/h (22mph)

Draganflyer Commander Photography Equipment List

- (1) Rugged transport case
- (1) Accessory transport case
- (1) Draganflyer Commander airframe
- (1) Quick release 2-axis stabilized mount
- (1) Sony RX100 Camera
 - 20mp 1" sensor, 3.6x optical zoom color camera
- (1) Handheld controller
- (1) Live video viewing tablet
- (1) Draganfly IP base station and stand
 - Includes mini tripod and one 1350mAh battery
- (4) 6750mAh DraganFuel HV flight batteries
- (6) Quick release props (2 spare)
- (1) Dual port Lithium Ion battery charger
 - Charge two batteries at once
 - Battery fire retardant safety bag
- (1) Set of accessories
 - (1) Aircraft tool kit
 - (1) Safety glasses
- (1) USB with all documentation
 - Pre-flight checklist
 - Post-flight checklist
 - Emergency procedures
 - Maintenance schedule
 - Equipment manuals
 - Pilot log book
 - System log book

Pictured with RX100 Payload

Compelling Use Cases:

Accident Reconstruction

Emergency Response

Tower Inspections

Real Estate

Site Management

Infrastructure Inspection

Technical Specifications

Maximum Takeoff Weight: 3.75kg (8.3lbs)

Maximum Payload: 1.0kg (2.2lbs)

Maximum Speed: 50km/h (31mph)

Max Flight Time w/Payload: 28 minutes

Max Operating Range: Visual Line of Sight
