

Smart Vital

By Fobi and Draganfly

Fobi and Draganfly have partnered to deliver the Smart Vital system for venue access management, including vital screening and instant Wallet pass results delivery.

Features

Eliminate Line-Ups & Increase Average Spend

Speed up check-ins with automated processes and increase average spend at your venue with fast-tracked entry. No need for additional staff training or manual screening.

Contactless

With digital Wallet passes and contactless validation, guests can access their health results directly in their mobile Wallets – with no need to download an app.

Real-Time Notifications and Updates

Trigger SMS or push notifications by location or time to increase engagement and keep your guests up to date.

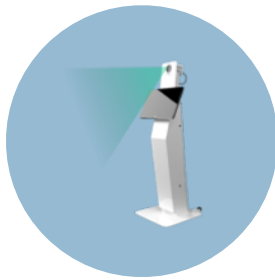

How it Works

1. Register

User opens a link sent by Fobi to enter their info & download their pass

2. Screen

User visits a kiosk at the event or uses their phone to assess their vitals

3. Results

User receives their results directly to their mobile wallet pass

4. Validation

The operator validates the pass visually or with Fobi Smart Tap or Scan
