

Draganfly  
Commander 3 XL

The **Commander 3XL Drone** is a high-endurance, weather-resistant, multirotor unmanned aerial vehicle (UAV). Easy to assemble and transport, our drone is compatible with a wide range of interchangeable payloads. The **Commander 3XL Drone** supports automated and manual flight operations, making it the ideal choice for industry leaders across a variety of major markets including public safety and agriculture.

## Easy Assembly

The **Commander 3 XL Drone's** fuselage consists of a simple rectangular tube. Each component of the drone has been specifically designed to ensure the airframe can pack down into a transportable case.

- **Two quick-release arm assemblies** insert into either end of the tube
- Propellers can be **quick-release** or **folding**
- Landing folds **below each motor** along the length of the arm
- Batteries are **semi-permanently attached** to carrier plates which allows for automatic connection during installation

### Significant Payload Capacity

Effectively carry **22 pounds (10kg)** for approximately **20 minutes**.

### Weather-Resistant Design

Strong performance in **light rain and snow**.

### Easily Extendable Range

Go beyond **1km range** with alternative radio equipment.

### Timely Deliveries

Utilize **drop or winch down systems** to deliver payloads

### Secure Communications

**North American-built** flight controllers, sensors and radios.
