

Starling X.2

The next-generation UAV communications solution conceived through ingenuity, and designed through collaboration.

Introducing the new **Starling X.2**, a next-generation aerial solution conceived through ingenuity, and designed through collaboration. **Starling X.2** combines Promo Drone's innovative, patent-pending UAV communication platform with the exceptional stability and maneuverability strengths of Draganfly's Commander 3 XL drone. Together, this winning system strategically reimagines promotion and communication platforms across multiple sectors to deliver crucial information in new and satisfying ways.

Starling X.2 marries the robust features of the Commander 3 XL, ensuring a stable and agile flight experience, with Promo Drone's vivid, state-of-the-art digital communication screens, enabling businesses and first responders entities to elevate their intended communication experiences and results to new heights. Starling X.2 captivates audiences and delivers impactful, timely messages across infinite scenarios. Whether it's used to **boost advertising, increase engagement at events, or highlight emergency and first responder communications**, Starling X.2 sets a new standard for enabling effective and engaging communication leveraging drone technology.

Early Warning Messages

In regions prone to natural disasters like storms, floods, or earthquakes, Starling X.2 provides **early warning messaging**. It can display **alerts, evacuation notices, and safety instructions** on one screen, giving residents crucial information to take immediate action. The other screen can show **real-time weather updates, radar images, or LIVE feeds from weather monitoring stations**, ensuring people stay informed and prepared for potential threats.

Disaster Response

In the aftermath of a disaster, Starling X.2 assists in disaster response efforts. It can display **real-time maps, evacuation routes, and information about available sheltering options** on one screen, helping affected individuals find necessary resources. Additionally, Starling X.2 can show **updates on rescue operations, emergency contact numbers, and safety precautions**, aiding in efficient and coordinated response efforts.

Missing Persons Notifications

Starling X.2 broadcasts missing persons notifications in populated areas. It can display **images and details about missing individuals**, while another screen can display **contact information for reporting any relevant information** to raise awareness and increase the chances of finding missing persons through reaching a wider audience.

Rally Point

The Starling X.2 serves as a **centralized rally point in disaster situations**, as well as during **large gatherings, protests, or rallies**. This versatile display system can be deployed to provide crucial information and coordination for attendees in times of crisis. In non-emergency settings, the Starling X.2 continues to play a pivotal role as a rally point display. It becomes a **central hub for attendees, showcasing event schedules, event logos, slogans, speaker lineups, and safety instructions** fostering a sense of unity and engagement among participants

Game Day Promotions

Starling X.2 enhances gameday promotions at sports events. It can fly **around the stadium, displaying real-time scores, player statistics, and highlights** on one screen; and, on another screen, it can showcase **sponsored advertisements, promotions, or discounts available** at concessions or team merchandise stores.

Sporting Updates

During sports events or tournaments, **Starling X.2 provides live updates** to the audience. It can display **instant replays, close-ups of important moments, and analysis** on one screen; and, the second screen can show **live scores, game statistics, and upcoming match schedules**. This enhances the spectator experience by providing real-time information and engaging content.

Advertising and Promotions

Starling X.2 with **dual display screens amplifies advertising and promotional messaging**. It can fly over crowded public spaces, such as parks, beaches, or festivals, **showcasing advertisements, upcoming events, and discount offers** on one screen. A second screen can display engaging visual content, such as **videos or images, to attract attention and convey promotional messages effectively**.

Starling X.2 offers versatile functionality across various locations and missions, including **sports, advertising, disaster management, and public safety**, providing an innovative and impactful way to communicate information to the public.
